

Call for papers 11th International Conference

DisCo 2016: Towards open education and information society

20. 6. – 22. 6. 2016, Prague, Czech Republic

We are on the cusp of a global revolution in teaching and learning. Educators worldwide are developing a vast pool of educational resources on the Internet, open and free for all to use. These educators are creating a world where each and every person on earth can access and contribute to the sum of all human knowledge. They are also planting the seeds of a new pedagogy where educators and learners create, shape and evolve knowledge together, deepening their skills and understanding as they go.

- Cape Town Open Education Declaration -

DisCo 2016 offers a platform for scholars, researchers, pedagogical staff, students,¹ educational start ups², educational NGOs and experts from the private and public sectors, in which they can join the discussion on topics related to media literacy and new technologies in education.

Conference themes

Open Education Resources (OER)
Libraries as gateways to open education
and information society
Gamification and serious games
Copyright law in education

Wiki systems
Inclusive education and technology
